Dear Andrei Timotin,

The title mentioned above has been evaluated for inclusion in Scopus by the Content Selection & Advisory Board (CSAB). The review of this title is now complete and the CSAB has advised that the title will be ACCEPTED for inclusion in Scopus. For your information, the reviewer comments are copied below:

Articles published in this journal are not being cited but the content of the journal impresses greatly, with an emphasis upon publishingly high quality and original research. The journal needs to take further steps to establish itself internationally - and the more that is published in English will help such a goal - but in terms of content alone and as a journal of regional significance it merits inclusion in SCOPUS.

+ The journal consistently includes articles that are scientifically sound and relevant to an international academic or professional audience in this field.

- Despite being published for quite some time, articles in this title have attracted few citations by other titles currently covered by Scopus.

+ In general, the content of the articles is consistent with the scope and aims of the journal.

+ This title addresses a subject area not properly covered by an existing journal.

+ The journal has clear aims and scope/journal policies that are consistent with the journal's content.

+ Peer review type is clearly stated and is supported by appropriate reviewer guidelines.

Our Source Collection Management department will contact the publisher of this title within the next three months to initiate the indexing process for Scopus. A content coverage agreement needs to be in place before we can start adding the content to Scopus.com. If you are the publisher, please do not send us your content yet unless requested by our Source Collection

Management department
